

A BETTER WAY TO MANAGE AND PROTECT PUBLIC ACCESS PCs

Drive Vaccine PC Restore Plus delivers breakthrough PC management capabilities, dramatically reducing the costs and complexity associated with the maintenance and repair of public access computer systems. Its **reboot-and-restore** technology prevents users from permanently changing system settings, thereby eliminating damage resulting from inadvertent user errors, malicious hacking, virus infections, system failures, and more. Each time a PC is scheduled to be restored - it reverts all inappropriate changes made by the previous user and automatically resets the PC to its baseline (desired) configuration.

Automated PC Maintenance

For organizations that maintain standalone workstations or networked computers, Drive Vaccine provides automated, cost-effective solution that increases system uptime and the productivity of both users and administrators, all while significantly reducing administrative burdens and maintenance costs.

Unrestricted PC access. Total control.

Drive Vaccine is invisible to the user and does not restrict the user from performing any Windows functions... Regardless of what any individual user does - downloads a virus, inadvertently deletes important system files, or maliciously tampers with settings - the PC will revert to its baseline state whenever it is restarted (or on its' set schedule). The PCs will be fully functional and ready for complete access by the next user - with no need to any IT troubleshooting or intervention.

Highlights

Reduce PC maintenance and repair costs

Prevent tampering or changes to system settings

Increase public access PC uptime

Enhance PC performance by removing website cookies, viruses, unnecessary plug-ins, and other hard drive clutter each time a computer is restarted

Streamlines the control and monitoring of networked PC's via remote management console

Restore on Reboot or user log-off

Restore on Idle PC (no PC activity)

Restore on an hourly schedule

Restore on a daily schedule or on first startup of day

Restore on a weekly schedule

Automatically accept OS and anti-virus updates

Restore while maintaining persistent data using Drive Vaccine's "Freeze Space" or virtual drive

"Drive Vaccine is fast and very reliable - All it requires is a simple Reboot to Restore our guest PCs to its trouble-free state."

Wil Smith, onboard IT manager RCCL

Simply reboot and restore... Access a trouble-free computer everytime.

Where Drive Vaccine fits in

Drive Vaccine PC Restore Plus is designed for organization that demand maximum availability and full functionality for PCs that are accessed by multiple users. It's an ideal workstation restore solution for educational institutions, libraries, hospitals, business centers, hotels, Internet cafes, PC training centers and other organization that need to automatically maintain PCs with minimal support

- > Educational Institutions > Public Access PCs > Internet cafes > Libraries
- > Colleges / University > Training centers > Hotels > Business centers
